## Verification of Prescriptions SOP

If you are a pharmacist who has been presented with a prescription purporting to come from Senti, in all cases, please call on **+447517 648 338**, so that we can verify the prescription before it is dispensed.

---

We contact all local pharmacies with information on our prescriptions and verify these prescriptions. If you have not received this information, please let one of our team know when you call the verification line on the number above.

As a respiratory care service, our prescriptions will predominantly be for inhalers, antibiotics, corticosteroids, and long-term respiratory therapies such as carbocisteine.

Please take extra care with prescriptions that are outside the usual scope of our practice and ensure you confirm both the indication for the prescription, but also the reason why the prescription of the non-respiratory medication wasn't referred back to the patient's GP.

---

### Currently:

- We **do not** issue repeat prescriptions.
  - We **do not** prescribe controlled medications.
- 

Thank you for reading this and verifying our prescriptions. We appreciate it.

Warm Regards,

Dr Philip Alton  
Founding Director, Senti
